Frontend Design Guidelines v2.4

Author: Bob Jones | Classification: Internal Operations

1. Executive Summary & UI Design Tokens:
All web interfaces must utilize curated HSL color palettes and modern Outfit typography.
Ensure responsive grid layouts adhere to the 12-column flexbox standard across mobile viewports.
Glassmorphism overlays should maintain a backdrop-blur radius of exactly 12 pixels.

2. Automated Accessibility Audit Compliance:
Interactive elements require unique descriptive identifiers to support automated testing suites.
Contrast ratios between background surfaces and foreground typography must exceed 4.5:1.
